Minimum Tool and Equipment List

The following software packages are required to install the system and application software after you replace the hard disk drive assembly:

- Windows XP Operating System Restore DVD Package for the AWG5000 or AWG7000 series instruments
- Product Software CD Package for the AWG5000 or AWG7000 series instruments

Installation Instructions

This section describes how to install the hard disk drive assembly into your instrument.

Installation Procedures

CAUTION. Before you remove or insert the hard disk drive assembly, make sure that the instrument is powered off. Failure to disconnect the power from the instrument may result in damage to the hard disk drive.

Removing the Hard Disk Drive Assembly

1. Unplug the power cord from the power connector on the rear panel.
2. Position the instrument on the work surface with the rear panel facing you as shown.
3. Loosen the two thumb screws securing the hard disk drive assembly to the instrument.

4. Slowly pull the hard disk drive assembly toward you. Note the orientation of the assembly as you remove it.

Installing the Replacement Hard Disk Drive Assembly

1. Orient the replacement assembly the same way as the original assembly. Install the replacement into the hard disk drive slot.
2. Push the hard disk drive assembly in until the data and power connectors are firmly engaged with the instrument.
3. Tighten the two thumbscrews to secure the hard disk drive assembly to the instrument.

Installing the Instrument Software

After you have installed the replacement hard disk drive assembly into the instrument, you need to reinstall the Microsoft Windows XP operating system and application software onto the hard disk drive.

Refer to the following documents for information on how to install the software:

- Windows XP Operating System Restore DVD Instructions for the AWG5000 or AWG7000 series instruments
- Product Software CD Instructions for the AWG5000 or AWG7000 series instruments

Touch Screen Adjustment

Perform the following steps to adjust the touch screen of the instrument:

1. From the Windows Start menu, select **My Computer** and right-click to display the pop-up menu.
2. Select **Properties** to display the System Properties dialog box.
3. Determine the version number using either of the following methods:
 - Click the **Support Information** button. A dialog box shows the version number.
 - The version number appears on the label of your Windows XP Operating System Restore DVD package that shipped with your instrument.
4. Adjust the touch screen as follows:
 - **For version 1.2.0 and below:**
 - a. Double-click the **Touch screen configurator** icon on the Windows desktop to start the touch screen program.
 - b. Follow the on-screen instructions to perform the adjustment using the stylus pen that was shipped with the instrument.

■ **For version 1.3.0 and above:**

- a. From the Windows Start menu, select **Control Panel**.
- b. Double-click the **Elo Touchscreen** icon. If the icon is not present, click **Switch to Classic View** in the Control Panel to display the icon.
- c. In the Elo Touchscreen Properties dialog box, click the **Align** button, and then follow the on-screen instructions to perform the adjustment.
